

# 2022 Veggie Garden Update

1. Initial Vision
2. March-April Work plan
3. Interested in pitching in?

# Initial Vision

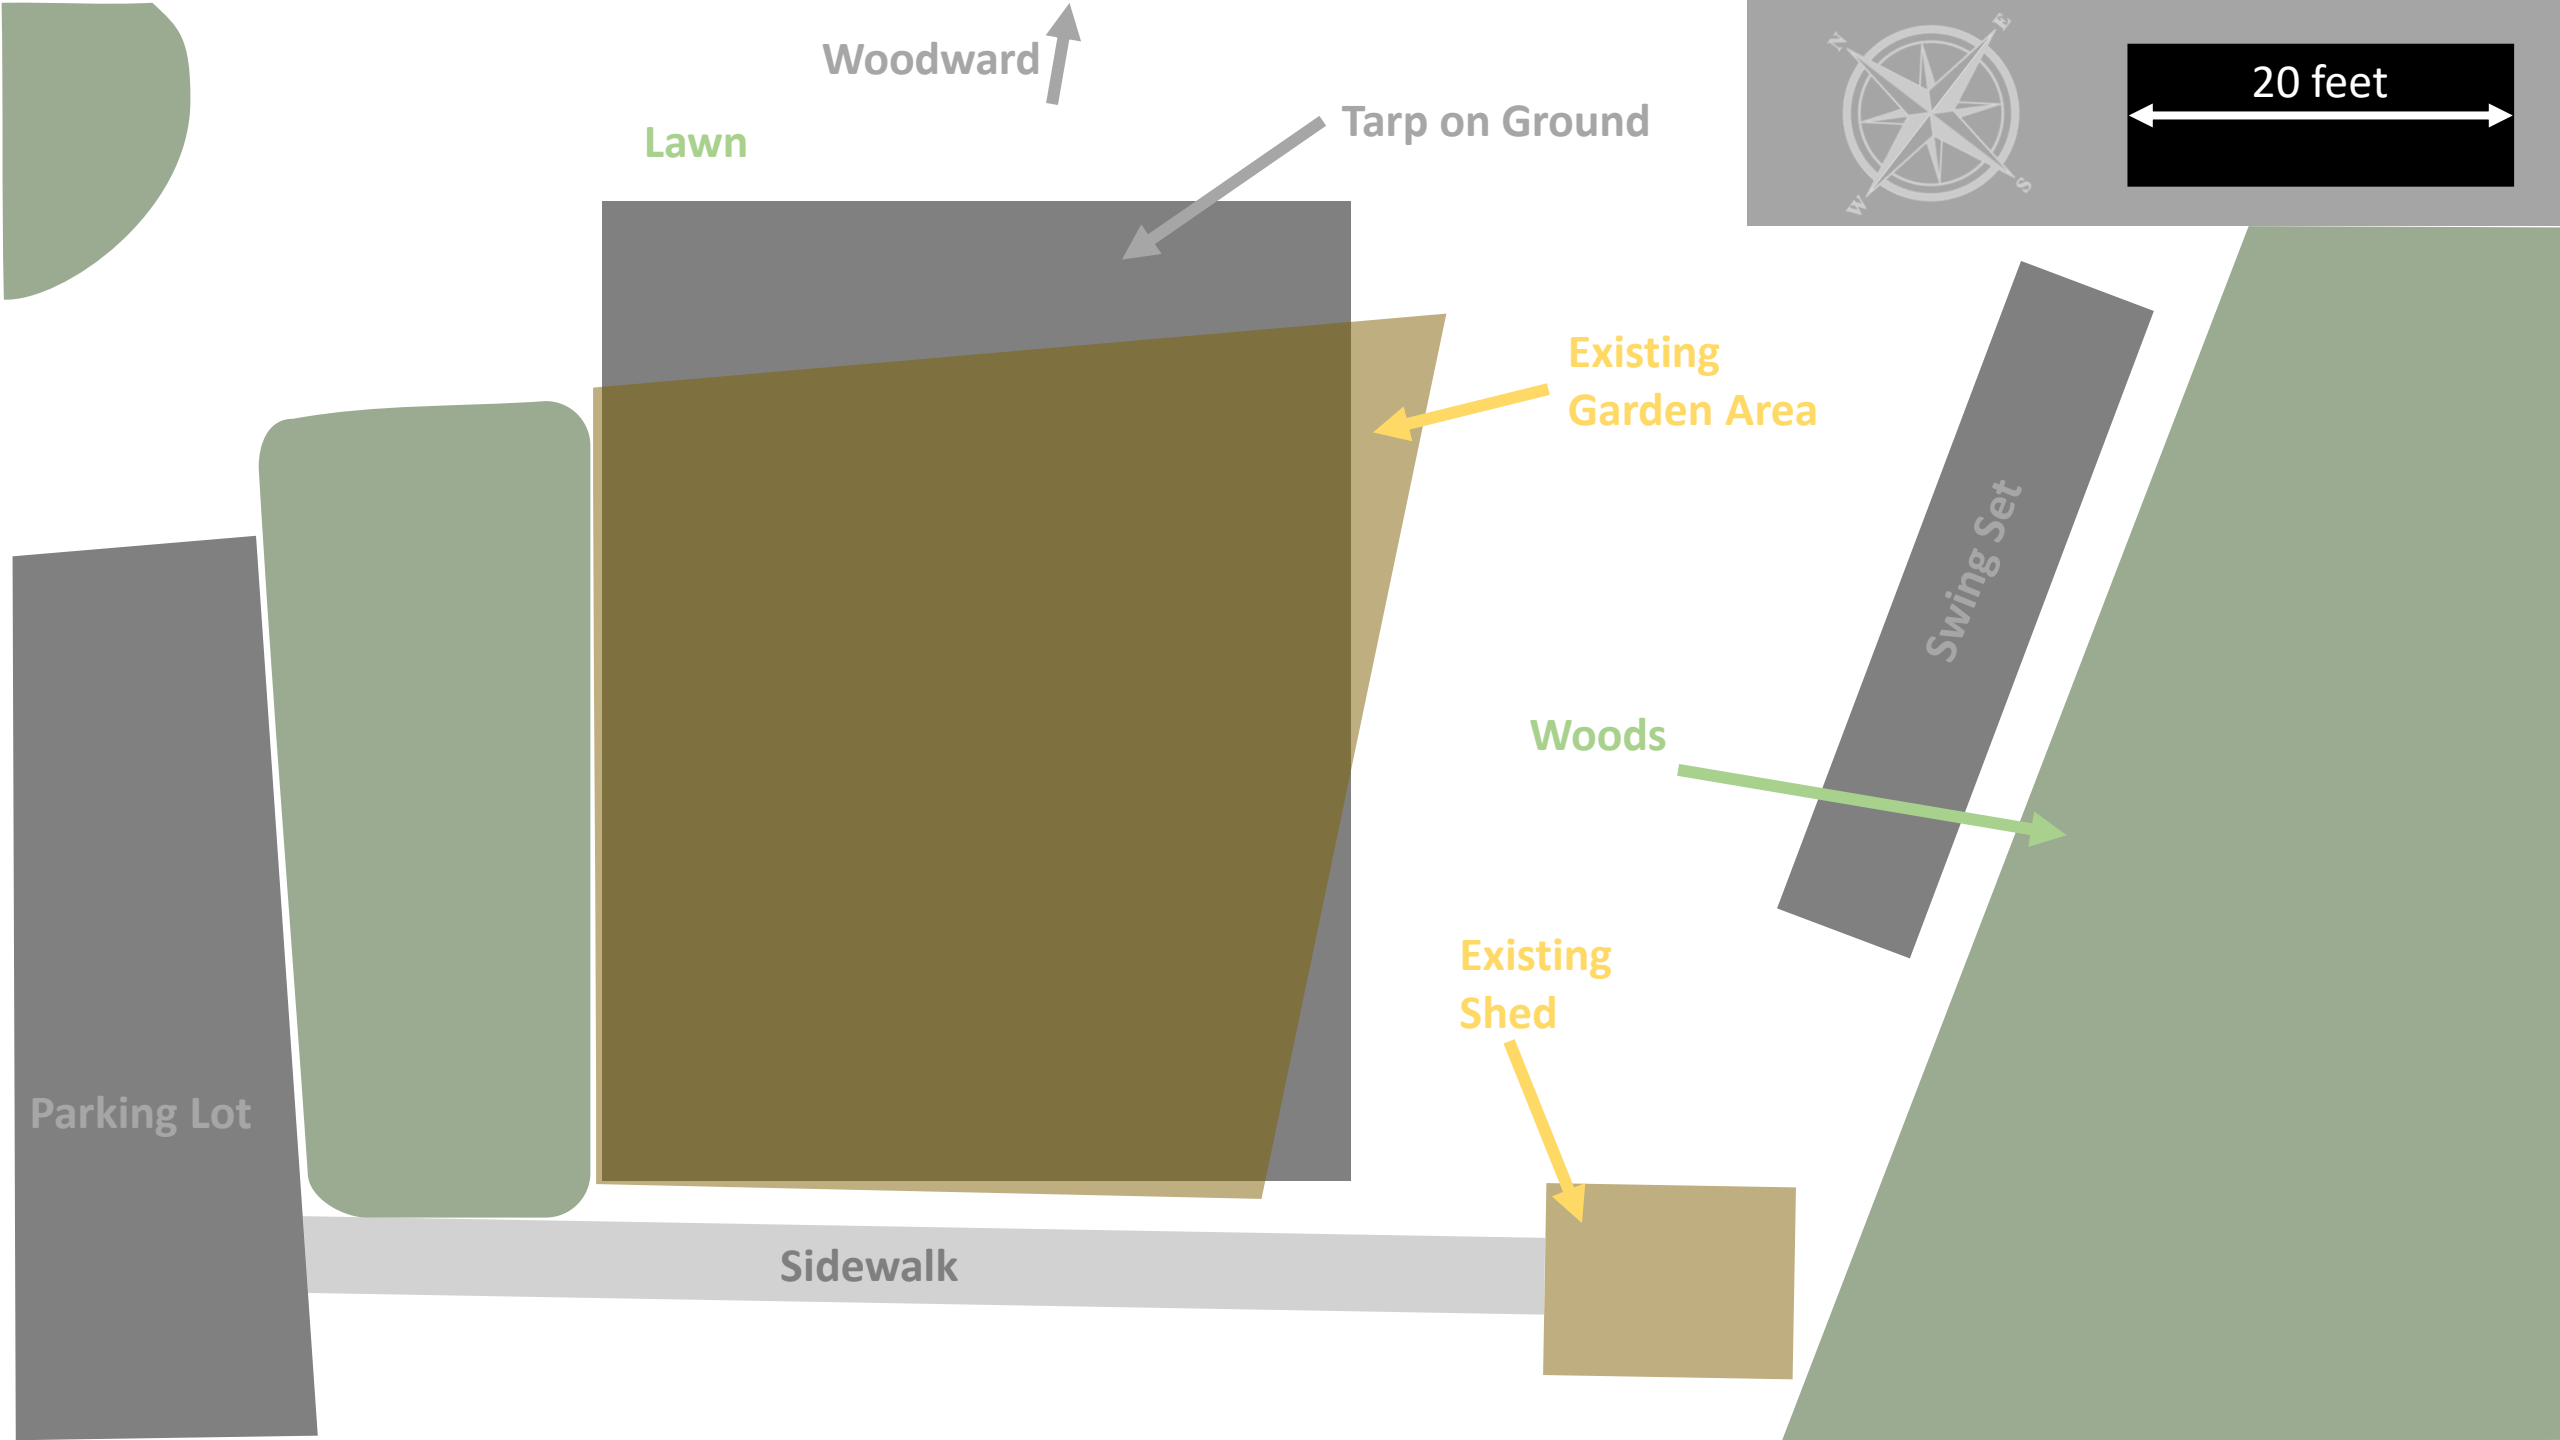

- Place for people can work together in nature
- Place where kids can get dirty, see fruits (veggies) of their labor, appreciate healthy food and healthy growing practices, and see the miracles of nature
- Healthy, organic, sustainably-grown food that we can share locally
- Note: we're calling this an "Initial" vision, because we welcome more ideas

# March-April Workplan

- We need a Fence and Irrigation
- City of Bloomfield Hills permit process nearly complete
- Nice 6-ft tall fence – cedar posts, buried 4ft deep, metal wire fencing extending 1ft deep into ground
- Planning 10 rows of crops, various veggies, starting from seeds
- For water, we'll setup rain barrels and a small collection roof. And we'll supplement with water from the church building via a buried pipe across the yard.

Rain Barrels and  
Roof for Collection  
and Cover

Gate

20 feet

29 posts  
200 linear feet of fence  
44' X 56' enclosed

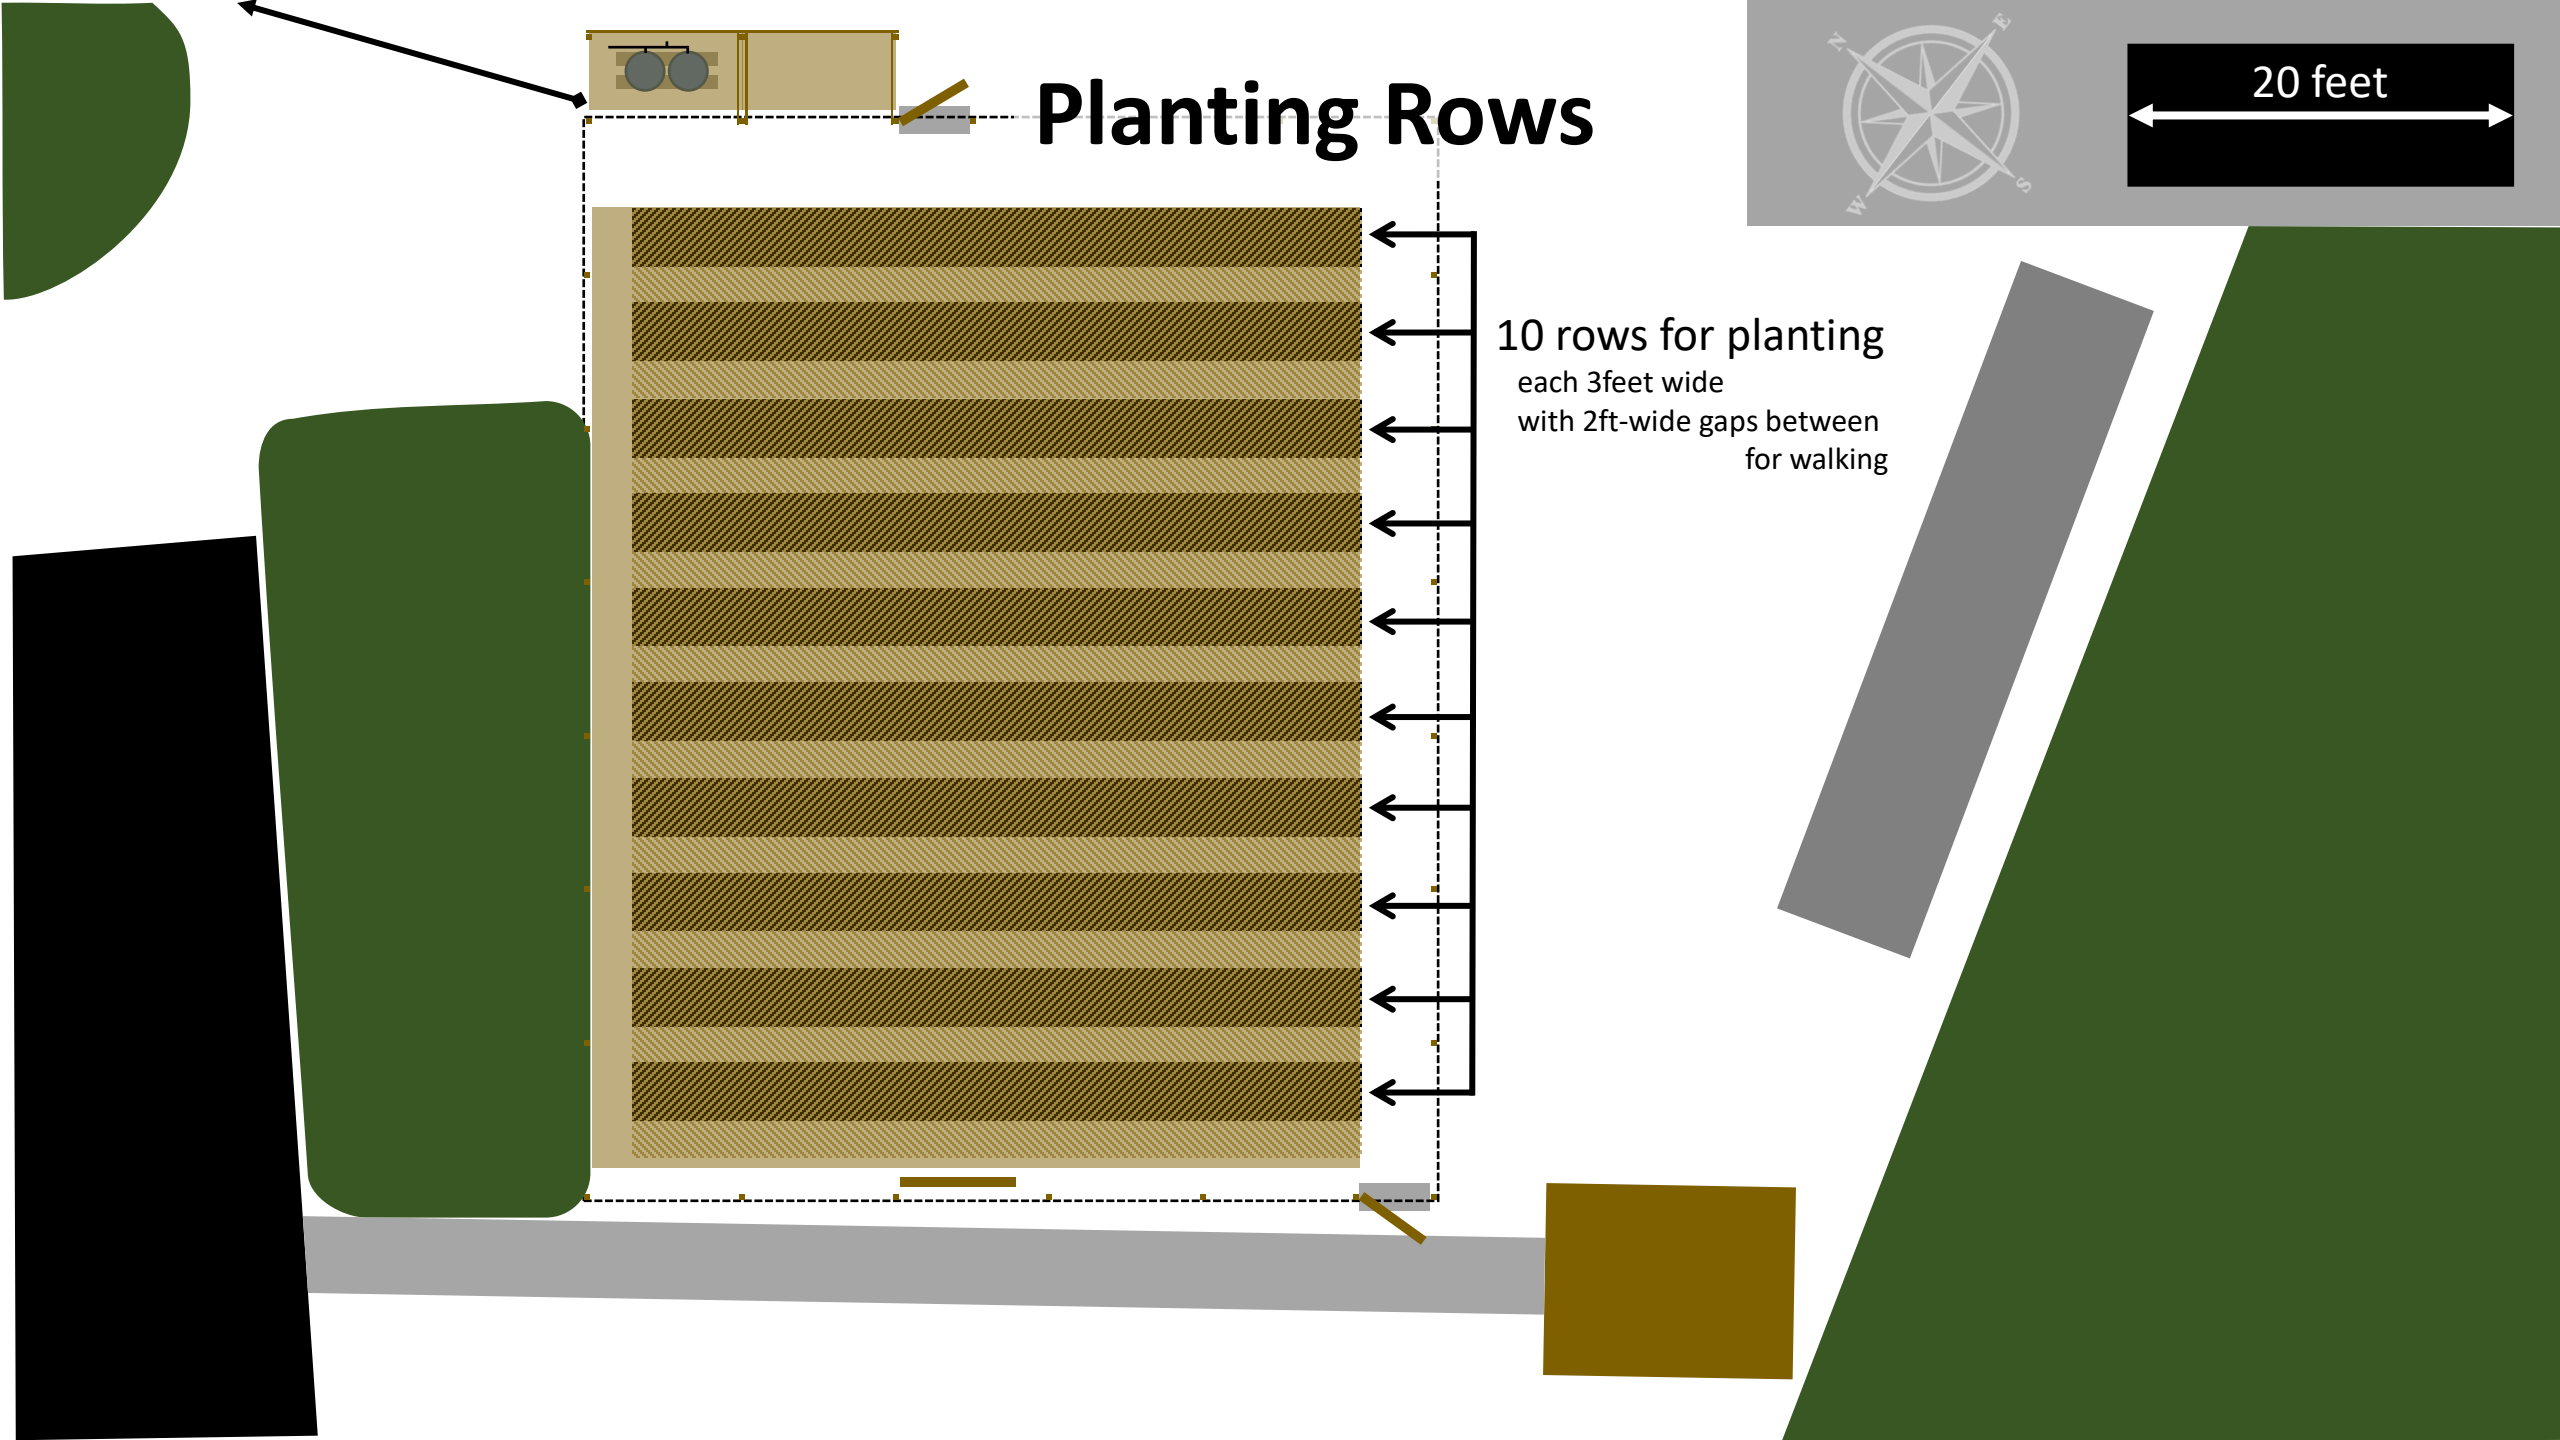

Gate

# Planting Rows

10 rows for planting  
each 3 feet wide  
with 2 ft-wide gaps between  
for walking

# View from Sidewalk, looking toward Woodward

# Interested in pitching in?

- There are all sorts of tasks ahead:
  - From heavy lifting to gentle planting
  - From solitary alone time to group planning
  - From outdoors work to in-car food distribution
- If you feel the call to do anything in particular, let us know
- In March, we'll start sharing weekly updates via email, including upcoming workplans and opportunities to help
- Contact: Ben & Maria Langhorst [Ben.Langhorst@gmail.com](mailto:Ben.Langhorst@gmail.com)
